FLO Components Autogreasers Chosen for Glasvan Live Bottom Trailer Special

FLO Components is happy to announce that Glasvan Trailers Inc. has chosen to use FLO's Automatic Lubrication Systems (ALS) as part of a limited-time special offer for new live bottom trailer purchases. Anyone who orders a new Etnyre Falcon Live Bottom 3, 4 or 5 axle trailer from Glasvan by December 15, 2010 will receive a FLO (Lincoln) ALS at half price.

FLO Appoints Sales Manager to Continue to Build Structure to "Meet Customers' Needs Better"

FLO Components continues to expand its resources to better serve customers in Ontario. We are pleased to announce the appointment of Steve Matheson as Sales Manager - Ontario. Steve's previous experiences over the last 12 years include working in a VP position in both Engineering and Sales/Marketing capacities. His primary focus will be to build the FLO sales organization in Ontario to increase local availability of technical support to our customers.

Winter-Prepping Your Auto Lube System

Winter is almost upon us, and as we gear up for the holiday season, let us not forget, that our mobile equipment also needs some extra TLC to prepare for the cold Canadian winter months. Whether or not you conduct regular maintenance inspections or “walk arounds”, here is a brief checklist of things you should do now to make sure your automatic lubrication system (ALS) operates properly throughout the winter:

Lincoln Offers High-Volume Grease Pumps

Lincoln has introduced its new High Volume PowerMaster Grease Pumps. Designed for the quick transfer of grease from drums and bulk containers, the 12:1 and 24:1 pumps are ideal for filling automatic lubrication system reservoirs, transferring grease to smaller containers and feeding measuring ejectors with restricted priming pressure.

The pumps offer positive priming with a shovel-type foot valve and provide 60 percent more output/stroke than Lincoln’s previous highest volume PowerMaster. When pumping #2 grease with a 4.25-inch air motor at 70 degrees Fahrenheit at 100 psi, the 12:1 pump provides up to 8 gpm (60 lb.) free delivery and up to 6 gpm (45 lb.) through a 20-foot by 1-inch hose. In addition to high-volume capability, the versatile new pumps provide low-pressure compatibility with measuring ejector systems.

The pumps are offered in 400-pound drum and stub length versions to fit a wide range of container sizes. An optional adapter is available which allows the pumps to be used with containers having 3-inch camlock outlets.

About *FLO Components Ltd.*

For over thirty years, leading manufacturing companies in a wide range of industries have depended upon FLO Components' turnkey lubrication "Solutions" to reduce unscheduled downtime and improve productivity. In addition to customized systems, equipment & lubricants, FLO Components' "Solutions" include system design, scheduled on-site maintenance plans, personnel training lubrication audits, in-house and on-site service and on-site installation.

For more information on FLO's systems or any of our Lincoln or other brand products offerings, please contact our Customer Service Department TOLL free at (800)668-5458, locally at (905)671-2355 or visit our web site at www.flocomponents.com.
