FLO Appoints Territory Sales Manager to Continue to "Meet Customers' Needs Better" in the Nickel Belt

FLO Components continues to expand its resources to better serve customers in Ontario. We are pleased to announce the appointment of Steve Morel as Territory Sales Manager - Sudbury. A native of Sudbury, Steve has previous technical and sales experience in the mining, steel, construction and transport industries, including millwrighting and working as a coach / trailer mechanic. Steve takes over for Ed Colley who retired after many years as FLO's Rep

and who was well known and respected in the industry.

Spring-Prepping Your Auto Lube System

Spring is here, and as we gear up for the upcoming production season, let us not forget that our mobile equipment also needs some extra TLC to prepare for the long summer months. Whether or not you conduct regular maintenance inspections or “walk arounds”, here is a brief checklist of things you should do now to make sure your automatic lubrication system (ALS) operates properly throughout the summer:

Lincoln Offers New Rotary Drum Pumps

Lincoln has introduced three new Professional Rotary Drum Pumps for reliable, no-mess fluid transfer in automotive, agricultural and construction applications. Models 1385 and 1385-H move oils, diesel, kerosene, coolant, non-corrosive materials, petroleum-based fluids, hydraulic oils and ATF, while FM-approved Model 1387 safely moves gasoline as well. In addition to outstanding vacuum capability, each self-priming pump features a graphite three-vane design for smooth fluid flow and no-splash fills. The high-tolerance, micro-finished bores and vanes provide maximum pump life, and the internal check of each pump

prevents drain back and ensures immediate restarting. Each pump has a seal-tight telescoping pick-up tube with strainer for 16- to 55-gallon drums with a 2-inch bung. Model 1385-H and Model 1387 include a heavy-duty 8-foot by 3/4-inch anti-static hose with non-sparking aluminum nozzle. Model 1387 also features a flame arrestor and anti-siphoning vacuum break.

About *FLO Components Ltd.*

For over thirty years, leading manufacturing companies in a wide range of industries have depended upon FLO Components' turnkey lubrication "Solutions" to reduce unscheduled downtime and improve productivity. In addition to customized systems, equipment & lubricants, FLO Components' "Solutions" include system design, scheduled on-site maintenance plans, personnel training lubrication audits, in-house and on-site service and on-site installation.
