FLO Components Solutions now include Alemite Products

The scope of our Total Lube Solutions has dramatically increased by FLO Components Ltd. obtaining access to the complete range of Alemite Lubrication manual and portable maintenance lubrication equipment.

This includes, not only Alemite's full line of Manual Greasing Equipment (reels, grease guns, fittings, pumps, metering valves and more), but also Alemite Diesel Exhaust Fluid (DEF) Dispensing Systems for shops servicing heavy-duty diesel vehicles.

Lincoln Lube Trolley - Designed for Convenience & Durability

Worried about too much clutter? Convenience is what the Lincoln Lube Trolley brings to your shop while keeping your business clear of safety hazards. It reduces the need for overhead hose reels or bench tanks.

The Lincoln Lube Trolley is great for heavy-duty, industrial and agricultural shop environments where space is limited, and safety is always a concern. The Lincoln Lube Trolley can be rolled out to be used then quickly stored out of the way when not in use.

279092 Trolley model for Oil:

Includes a 3:1 pneumatic pump, heavy-duty 30-ft. hose reel, electronic meter that measures in pints, quarts, gallons or liters, filter/regulator/gauge, connection hoses and fittings.

279091 Trolley model for Grease:

Includes a 50:1 pneumatic pump, follower for 400 lb. drum, heavy-duty reel with 30-ft. high-pressure hose, heavy-duty control valve, universal swivel, filter/regulator/gauge, grease connection hoses and fittings.

Macnaught Battery Operated ATF Pump Stem Kits - BOP ATF

FLO previously introduced to the Canadian market the BOP20 and the BOP60 – the world’s first industrial-grade, completely portable and rechargeable, 18V battery operated oil pumps for 5-gallon buckets and 16-gallon containers respectively.

The modular design of these pumps (along with Accessory Stem Kits) allows the Powerhead to be easily transferred from one pump stem to another, to reduce set-up costs and eliminate cross-contamination. The new customized design BOP Pump Stem Kit ATF, is a useful addition to any workshop for dispensing Automatic Transmission Fluids. Developed specifically for use with ATF chemistry, the BOP ATF is available to suit most common 20 litre (5GAL) and 60 (16GAL) litre drum sizes.

The BOP ATF can readily dispense up to 4.5 litres (1.2GAL/min) per minute, making it the best way to dispense ATF in application. Both BOP20 & BOP60 ATF variants come with a 5 foot hose connected to an easy flow control nozzle. Both pumps include a unique red nozzle hook for easy identification.

Technical Specifications

- Compatible with ATF
- Delivery rate - Up to 4.5L/min (1.2GAL./min)
- Specially designed pump to handle ATF
- Adjustable Suction Tube
- Drum size - Nominal 20L (5GAL) or 60L (16GAL)
- 1.5m / 5 foot wire reinforced clear PVC hose
- On demand flow control

Lincoln Low-profile Drains

Lincoln now offers a professional alternative to lifting heavy vehicles during fluid changes. Ideal drains for RV, truck, heavy equipment maintenance, repair, and more, these low-profile truck drains can be easily positioned under high-clearance vehicles for capturing used fluids including motor oil, coolant and transmission fluid.

All models feature a 17-gallon (65 liter) capacity reservoir molded from robust, lightweight high-impact polypropylene and mounted on four 4 inch (100 mm) diameter swivel casters. The drains offer a choice of three discharge methods.

About *FLO Components Ltd.*

For over thirty years, leading manufacturing companies in a wide range of industries have depended upon FLO Components' turnkey lubrication "Solutions" to reduce unscheduled downtime and improve productivity. In addition to customized systems, equipment & lubricants, FLO Components' "Solutions" include system design, scheduled on-site maintenance plans, personnel training lubrication audits, in-house and on-site

service and on-site installation.
