Product Announcement

June 2009

Call Us For:

Dear Valued Customer;

We would like to take this opportunity to thank you for your continued patronage of FLO Components Ltd. For your convenience, this e-mail lists the various product lines FLO now carries to help you meet all your customers' lubrication requirements.

Lubrication Equipment from Lincoln, Graco, Oil-Rite and Trico

No matter the industry or application, you will always have critical points to manually lubricate. FLO can be your preferred choice for all your manual lubrication equipment needs. We supply a full line of lubrication products:

- Positive Displacement Metering Valves
- Grease guns and accessories
- Grease pumps, swivels
- Hose reels
- Grease tubing
- Grease fittings, adaptors and more.

Metering, Dosing Fluid Handling and Dispensing from Lincoln and Dopag

FLO provides Solutions for processing bulk material transfer and mixing of viscous material for many applications including handling of adhesives, chemicals, lubricants, printing Inks and solvents. Our Solutions are widely used in diverse production settings including: automobile and component engineering, building construction, machine and instrument fabrication, electrical and electronics industries, mould-making, manufacture of sporting goods, and production of household articles.

High-Temperature Conveyor Lubrication from Lincoln, Oil-Rite and Trico

FLO carries a full range of chain lubrication systems, in drip, brush, spray and roller configurations, to extend chain life, cut downtime, save electricity and increase profits.

Single Point Lubricators from Perma

Every machine has critical lubrication points that are located in hard-to-get locations. FLO's Single Point Lubricators are a relatively inexpensive Solution to this issue. Simply install the Lubricator either directly on the bearing or through a remote line, set the timer as applicable, record the scheduled time for replacement and there is one less lubrication point to worry about. Typical applications include: electric motors, pumps, roller and slide bearings, chains, conveyors bearings and chains and open gears.

Specialty Lubricants from Petro-Canada, Anderol and Shell

Demanding applications require high performance lubricants. Our lines of synthetic lubricants are used on mobile equipment bearings, hydraulic systems, compressors & vacuum pumps, gas turbines, and automotive & transmission bearings.

FLO also carries a wide selection of food grade lubricants, and oils for compressors, oven chains, hydraulics and seamers, to meet all your food and beverage industries' special requirements. Our selection of HACCP compliant lubricants include products from Anderol, Petro-Canada and Shell.

About *FLO Components Ltd.*

For over thirty years, leading manufacturing companies in a wide range of industries have depended upon FLO Components' turnkey lubrication "Solutions" to reduce unscheduled downtime and improve productivity. In addition to customized systems, equipment & lubricants, FLO Components' "Solutions" include system design, scheduled on-site maintenance plans, personnel training lubrication audits, in-house and on-site service and on-site installation.

For more information on FLO's systems or any of our Lincoln or other brand products offerings, please contact our Customer Service Department TOLL free at (800)668-5458, locally at (905)671-2355 or visit our web site at www.flocomponents.com.
