Welcome to *FLO Components* News

FLO Service allows you to stay focused on YOUR Core business.

Flo Components offers a complete range of services including on-site installations, surveys of existing lubrication systems, training and lubrication audits.

Installation Capability

Flo Components provides you with on-site support with our Industry exclusive "MOBILE" workshop. Housed in a heavy-duty four wheel drive custom built truck are hydraulic crimpers, welding equipment, torches, extensive parts AND equipment inventory.

In addition, FLO is the only company in the industry with a formal on-going technician training program. Over 90% of our technicians have either a skilled trade license or are currently registered in an applicable apprenticeship program. Our customers have the confidence we have the capability to send the right people with the right tools. Result – the work gets completed right the first time!

Reduce On-going Costs with our Maintenance Plans

Have our qualified technicians survey the lubrication systems on your critical production machines on a scheduled basis. You will receive a checklist documenting items surveyed with recommendations for major work if required. Depending upon machine availability, minor items can be repaired during the survey. Your key personnel can focus on your CORE business without having a major impact on your annual maintenance budget.

Training Courses

Our training courses are taught by industry experts with over 75 years of combined working and teaching experience in the field of industrial lubrication. We are in the business of helping your people reap the benefits of better lubrication procedures and practices for your company.

Through classroom seminars and workshops, your company's specific lubrication problems will be discussed and analyzed. We work with your people to provide an objective process to determine what can be done to solve your issues now and over the long term.

Lubrication Audits

Save money by consolidating lubricants. We will do an NO-OBLIGATION "ON-SITE" audit which includes:

- * Reviewing of all your lubricants - where, when and what pieces of

equipment they are used on.

- * Reviewing your key production machinery and their existing systems. If there is not a system installed, we will survey all the lube points. Our recommendations will determine each points lube requirements and the most cost-effective way to ensure this is being done.
- * If there is an existing auto lube system, a complete review of all the documentation layout drawings, service manuals for major components.
- * Working with your key lubricators, we will review your processes, procedures and supporting documentation. With this information, you then have the ability to make informed decisions on potential changes in processes, products and applications.

For more information contact **FLO Components** at (800)668-5458, (905)671-2355 or visit our web site at www.flocomponents.com

The Right Grease – Are you using the right grease for your application?

Don't know for sure. Let us do the following two simple steps to ensure you have the best and most cost effective lubrication for your equipment.

Step #1

We review the application. Criteria looked at that relate to your Environmental & Mechanical Conditions such as :

High Temperature	High Speed
Water Resistant	High Load
Low Temperature	Chemical Resistant
Food Grade	Wire Rope

Step #2

We determine which Grease Thickener Type is best suited to the Application.

Each one has Its own Advantage and Disadvantage associated to the application and conditions. Some of the benefits associated to each thickener are:

Lithium	Good multi purpose grease. Limited high temperature
Lithium Complex	Excellent for wide temperature range applications
Aluminium Complex	Good for food processing applications
Calcium	Exceptional load capability
Silica	Good Mechanical resistance
Inorganic	Good for High Temperature and Water Resistant

Based upon our analysis, we will recommend the Grease that is most cost effective for your application.

For more details on how we can help you select the right grease, please contact **FLO Components** TOLL free at (800)668-5458, locally at (905)671-2355 or visit our web site at www.flocomponents.com.

About **FLO Components Ltd.**

For over thirty years, leading manufacturing companies in a wide range of industries have depended upon **FLO Components'** turnkey lubrication "Solutions" to reduce unscheduled downtime and improve productivity. In addition to customized systems, equipment & lubricants, **FLO Components'** "Solutions" include system design, on-site installation, in-house and on-site service, scheduled on-site maintenance plans, personnel training and lubrication audits.
