Welcome to *FLO Components* News

New Dual-Inlet, Air-Operated, Double-Diaphragm Pumps

FLO Components is now offering a new line of Dual-inlet, Air-operated, Double-diaphragm (AODD) Pumps for continuous use in heavy-duty vehicle service and industrial applications, manufactured by Lincoln of St. Louis. Originally developed for antifreeze/water mixtures, the pumps dispense other light fluids compatible with Buna-N, aluminum and/or polypropylene.

The AODD Pumps feature dual inlets to mix and dispense two fluid products in a 50:50 ratio. Available in ½-inch and 1-inch sizes, the pumps can meet the volume needs of many specific applications. In addition, the units can be purchased with polypropylene or aluminum pump bodies for shop, mobile and heavy-duty installations.

All Lincoln AODD Pumps now come with a five-year, limited warranty, and applicable models have UL, ATEX and CE certifications/approvals. The pumps will not fail to start due to air valve over-centering. They have a maximum dry prime capability of up to 24-feet water – 25 percent greater than most competitive pumps – and provide a free flow rate 10 to 25 percent higher than many premium priced pumps.

New 8 GPM and 12 GPM Fluid Meters

The new 8 GPM and 12 GPM Fluid Meter Series features a unique design to allow exceptionally high flow rates. Coupled with high 1,500 psi operating pressure, these meters reduce dispense time while improving productivity and user safety. The Fluid Meter Series enhances safety with working pressures 50 percent higher than other meters. Offered in electronic and mechanical models, the meters are available with rigid or flexible hose extensions and feature an ergonomic design for operator comfort. All units have a ball-bearing swivel and a removable filter screen to capture contaminants. In addition, the Fluid Meters are covered by a five-year

warranty.

New Dual Support Hose Reel

Utilizing the proven technology of Lincoln's 94000 Series reels this heavy-duty reel includes a dual arm, dual axle and dual base for added stability in demanding environments. The support arm's three-point bolt design allows for easy hosing of the reel at installation and offers instant access to the reel's working parts. Its dual support from base to axle to roller outlet provides superior performance in applications with heavy vibration and impact.

New Mini Workbench Reel

The new Mini Workbench Reel for air/water or oil applications is the narrowest in its class. This compact hose reel has a 5-1/4-inch width and 14-inch spool, making it easy to install under workbenches or in cabinets. The Mini Workbench Reel's 1-inch quality spring provides reliable, consistent performance and retractability. Its integrated swivel stem and shaft design makes servicing the reel a simple task.

Made in the United States and featuring a five-year warranty, the unit has a high-gloss, UV-resistant powder coat finish to reduce scuffs and impact marks.

About *FLO Components Ltd.*

For over thirty years, leading manufacturing companies in a wide range of industries have depended upon FLO Components' turnkey lubrication "Solutions" to reduce unscheduled downtime and improve productivity. In addition to customized systems, equipment & lubricants, FLO Components' "Solutions" include system design, scheduled on-site maintenance plans, personnel training lubrication audits, in-house and on-site service and on-site

installation.

For more information on FLO's systems or any of our Lincoln or other brand products offerings, please contact our Customer Service Department TOLL free at (800)668-5458, locally at (905)671-2355 or visit our web site at www.flocomponents.com.
